for the  
challenge?

# HOW PROTOMET DRIVES INNOVATION

## World-class Manufacturing

- Protomet provides high-precision production manufacturing and finishing for clients in a variety of markets, including marine and boating, automotive, homeland security, industrial, energy and power.
- In today's ultra competitive marketplace, the pressure is always on boat manufacturers to deliver a better boat with each new model year. To do this, you need engineering resources and premium boat components. For more than 20 years, Protomet has been the secret weapon of the world's best boat companies. We partner with you to bring your vision to life.
- For more than 20 years Protomet has invested in our customers' success. We know the marine industry has its own unique set of requirements, challenges and demands. We also recognize the nuances between different types of boats. We wilensure that our manufacturing process fits the needs of your design.

## Award Winning Design

- Whether you already have a design or simply have a great idea, Protomet's design innovators will sit with you to make sure it's manufacturable, discuss ways it might be improved, and have a physical prototype delivered to your desk in just a few short weeks. Nothing could be faster or easier.

## Engineering Excellence

- Engineering isn't just what we do at Protomet – it's who we are. Engineering is the very soul of our company. Our engineering department is staffed with a committed group of more than 20 engineers who know the marine industry inside and out and can make your design dream a reality.
